# CAPSULE CHECKWEIGHER ACCURA series

# ACCURA series

Find this information on our website:  
Machinery > Capsule checkweigher > ACCURA 40 FF

The ACCURA series of automatic 100% capsule checkweighers is designed specifically for precise automatic and continuous weighing of every hard capsule – whether empty, filled or partially filled, with anything from powder to pellets. It uses the latest digital technology to check the weight of the filled content of capsules.

ACG's precision capsule checkweigher is best suited for medium to large production batches with a capacity of 35,000 capsules per hour.

## Features

## Benefits

A format-free mechanism capable of handling capsules of sizes 00 to 5	No need for additional investment, and minimal changeover time
Achieves a weighing accuracy of $\pm 2\text{mg}$ , with a precision of $\pm 0.2\text{ mg}$	Ensures high-quality, accurately weighed capsules
Uses an Electro-Magnetic Force Restoration (EMFR) weigh cell from Wipotec, Germany	Ensures repeatable performance over extended periods
A user-friendly, interactive IPC that's fully compliant with 21 CFR Part 11	Detailed statistical analysis of weighed and rejected capsules for audit requirement
Can be integrated with capsule-filling machines	Seamless integration
Rejection acknowledgement system	Ensures rejected capsules are separated

## Technical specifications

Model	Output (capsules/hr)	Weighing accuracy (mg)	Weighing range (mg)
<b>ACCURA 100 FF</b>	100,000 capsules/hr	±2mg with a precision of ±0.2mg	20 to 2,000mg
<b>ACCURA 200 FF</b>	200,000 capsules/hr	±2mg with a precision of ±0.2mg	20 to 2,000mg
